

July 6, 1937

Mr. Francis Lyman  
Boulder, Utah

Dear Sir:

REL: BOULDER CREEK SYSTEM

In accordance with a recommendation made by a majority of the water users, I am appointing you Water Commissioner on the **Boulder Creek** river system for the season of 1937, under authority of Section 100-5-1, Revised Statutes of Utah, 1933. Your official commission is enclosed herewith.

Please familiarize yourself with the law under which the administration and distribution is to be made, being Sections 100-5-1 to 100-5-10 inclusive, Revised Statutes of Utah, 1933, as amended by the Session Laws of 1935 and 1937. You should also inform yourself on the rights of all the users, whether such rights be established by "use" or "diligence", decreed rights, or rights by appropriation approved by the State Engineer, so that at all times you will be in full possession of the facts relating water rights in your distribution system and thus be able to inform any inquiring user with respect to his rights or the rights of others.

Your records of flow of the main stream and diversions therefrom should be recorded daily and kept in such form as to be readily accessible; also filed so that at the end of the irrigation season you will have full data for use in making a report which will be expected of you. Such a report will be exacted from each and every Water Commissioner.

Yours very truly,

T. H. Humpherys,  
STATE ENGINEER.

1/5  
Encl. Official Commission
